

Count It Down

You are a toy store owner beginning with the coins below. First count the coins to find out how much money you start with. Then, as you "buy" each item, cross off the coins needed to pay for it, and count how much money you have left after each purchase.

You start with:

\$.

You buy 2 giant balloons for 7¢ each.
Cross off 7¢ two times (use 3 coins for each).
How much do you have left?

You now have:

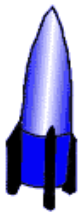

\$.

You buy 3 boxes of cards for 15¢ each.
Cross off 15¢ three times (use 2 coins for each).
How much do you have left?

You now have:

\$.

You buy 2 rockets for 35¢ each.
Cross off 35¢ two times (use 2 coins for each).
How much do you have left?

You now have:

\$.

You buy a small toy radio for 30¢.
Cross off 30¢ (use 3 coins).
How much do you have left?

You now have:

\$.
