

Toy Stories

Find the answer to each story problem. Write the whole problem in the boxes below it.

Pete bought a large etch-a-sketch for 68 cents and a mini travel version for 21 cents. How much did Pete spend in all?

$$\boxed{} \text{ ¢} + \boxed{} \text{ ¢} = \boxed{} \text{ ¢}$$

Jill is going to the beach and wants to buy a shovel and pail to build a sand castle. She has 93 cents. If she spends 89 cents on a shovel and pail set, how much change will she have left?

$$\boxed{} \text{ ¢} - \boxed{} \text{ ¢} = \boxed{} \text{ ¢}$$

Dave had only 27 cents, but he sold his blue soccer ball to Fred for 60 cents. How much does Dave have now?

$$\boxed{} \text{ ¢} + \boxed{} \text{ ¢} = \boxed{} \text{ ¢}$$

Dana wants to buy a new doll for her collection. A large doll costs 97 cents, and a small one costs 55 cents. How much more does a large doll cost than a small one?

$$\boxed{} \text{ ¢} - \boxed{} \text{ ¢} = \boxed{} \text{ ¢}$$

A man was buying presents for his grandchildren. He bought a small toy truck for 52 cents and a little teddy bear for 46 cents. How much did the man spend on his gifts?

$$\boxed{} \text{ ¢} + \boxed{} \text{ ¢} = \boxed{} \text{ ¢}$$
